\$2.00 PER YEAR; SINGLE COPY 5c

James Scott Died in Toronto

Former Master Mechanic of International Mine Left Coleman in 1931. Golden Wedding, 1933.

MANY in Coleman learned with deep regret of the passing of James Scott, for 22 years master mechanic and who resigned in August 1931 to live in eastern Canada. At that time he was honored with a banquet and presentation by officials and employees. It is of interest to re-print a sketch of Mr. Scott's life, from The Journal of Sept. 10, 1931:

"It was from Ontario Mr. and Mrs. Scott came west to Calgary, where for six years Mr. Scott was with the C.P.R. as locomotive foreman. In 1903 he came to Lille as master mechanic for West Canadian Collieries, of which Mr. Whiteside was then general manager. When Lille was abandoned, he took a similar position with the International, and has seen a great deal of development here.

For six years he was secretary-treasurer of the Presbyterian church in Coleman, and Mrs. Scott also took a prominent part in church activities.

It is a far cry from his old home in Hawick, Roxburghshire, Scotland, to the west, but it was there that Mr. Scott was apprenticed as a machinist. He was truly a son of the soil, his father owning a farm now carried on by his older brother, and which has been in the family for four generations. But agricultural pursuits did not appeal to the future master mechanic, and he decided to launch out in the field of iron and steel and steam, with the result that after completing his apprenticeship he came to Ontario, where he worked in the Kingston Locomotive Works and later on the Brockville and Ottawa railroad, since absorbed by the C.P.R.

Their daughter, Mrs. J. C. Hodgson, well known to many Coleman friends, is living in Winona; Charlie in Tacoma and David is boiler inspector for the C.N.R. at Winnipeg.

Mrs. Scott is at present living in Toronto.

Railway Business Means Everything

RAILROAD Business furnishes a livelihood to mine workers and business men of the Crow's Nest Pass town. Without it they would be moving elsewhere.

Remember this when solicited to use other means of freight and passenger transportation. Do not commit business suicide.

Always specify "Ship by Rail" and travel by rail for comfort and service.

Social Crediters Re-Organize Here

Registration Dates Aug. 12-14—Albert E. Knowles President of Local Executive.

Officer and delegates under the new constitution were appointed at a well attended meeting on Wednesday evening in the United church club room. Clerks, assistants and interpreters were also appointed to conduct the registration on Aug. 12-13-14, from 8 a.m. to 10 p.m., possibly in the Community hall.

New officers elected were A. E. Knowles, president; Alex. Easton, vice-president; A. Webster, secretary; Mrs. Ankil, Mrs. L. Richards, F. Antrobus, L. Jones, Tom Siska, J. L. Lonsbury, C. McQuarrie, Tom Goldring, A. Webster, A. E. Knowles, group executive; F. Antrobus, L. Jones, T. Goldring, A. Webster and A. E. Knowles were also appointed as zone council executive.

Election of officers for miscellaneous committees was left until registration is completed. Supervisors for the registration campaign, A. E. Knowles, A. Easton.

Approximately 20 clerks, assistants and interpreters will give their services for registration, divided into two shifts, to allow those working in the mines to fill their duties.

Those unable to register on the dates given, will be able to register during the remainder of August and September, after which registration will close till the following June.

Those incapacitated or in hospital will be visited by special committees to register, if names are left with Mr. Knowles or Mr. Webster.

An explanation of the circulation of Prosperity Certificates was given by Mr. Knowles and L. Jones.

Pythian Sisters Delegate

Mrs. J. Glendenning has been honored by the Alberta Grand Lodge in being appointed delegate to the convention of the Supreme Grand Templars of Pythian Sisters at Detroit, Mich. She left on Sunday, going via Toronto, where she will visit relatives, and will return via Ottawa.

A Worthy Achievement

W. Goodwin, employed at International mine, recently passed his examination for first-class papers, qualifying him for the position of mine manager. This is the first local candidate who has qualified who has not attended university and his success is due to his own efforts and home study. He attended high school in Bellevue, and has been employed for some time as fire boss and assistant pit-boys at International mine.

LOOKING BACKWARD

Glimpses of News From First Issue of Coleman Journal of September 1, 1921

Coleman's leading business houses have been steady advertisers in The Journal since its inception. Looking over back files gives a record of steady progress of these firms, and these weekly announcements over a space of 15 years, when The Journal was established by the late V. C. Dunning, prove very interesting.

Occupying the largest space in the first and succeeding issues, is the late W. L. Oimette's store, whose introductory paragraph in his ad states: "This week the Coleman Journal makes its initial bow to the general public. We are sure all are pleased to have a good live newspaper in the town once more. Let us do all we can to boost it along. This part of The Journal will be devoted to Oimette's Store News every week."

Mr. Oimette is remembered as a public-spirited man who occupied a prominent place in community life, and his passing in 1924 was marked by deep mourning by the entire populace. His son Charles, now of Vancouver, carried on till 1927, when he sold out, and Leosky, Ledieu Co. moved in from opposite the Empire hotel and whose business has steadily developed until their turnover is the largest in town. They, too, have advertised in The Journal every week since it was established in 1921.

Other advertisers in the first and succeeding issues still going strong are Coleman Cash Grocery, of which J. M. Allan is proprietor; and who has steadily built a business with a reputation for high-grade groceries; H. C. McBurney, whose drug store advertisement has appeared every week since The Journal commenced publication; Alex. M. Morrison, who in 1921 was advertising McLaughlin automobiles, and has continued to sell them since; G. R. Powell, jeweler and graduate optician, who recently sold his business to J. M. Chalmers; Coleman Meat Market, Charles Nicholas, Coleman Hardware Co., Frank G. Graham and others.

Mrs. H. E. Gate was also among the early advertisers in The Journal, and W. N. Donaldson, humorous Scottish tailor, since dead, also carried a space. In the issue of Dec. 1, 1921, it is recorded that Hon. R. B. Bennett held two meetings in Coleman in the interests of H. M. Shaw, Conservative candidate, addressing the ladies in the afternoon, and that Mr. Bennett was entertained at the home of Mr. and Mrs. Frank G. Graham, they being old acquaintances in New Brunswick. John Scott, former master mechanic at International mine, was chairman of Mr. Bennett's meeting.

James Fairhurst also is in the limelight in this issue as Labor candidate for the Federal house, and speakers in his behalf were C. E. Cameron, barrister, of Lethbridge, and H. C. Ostlund, K. C. of Lethbridge.

J. E. Gillis, Blairmore barrister, was the Liberal candidate, who states in his appeal through a letter in The Journal: "I believe there are enough of you opposed to an autocratic and irresponsible government, as well as to the class aspirations held by my Progressive and Labour friends, to elect me."

George G. Cooté, was the U.F.

A candidate, and the following issue records his election with a majority of 3,400 over the other three candidates, all losing their deposits. The U.F.A. candidates were swept into power in a manner similar to the Social Credit candidate in 1935, and now the party is defunct as a political body.

Turning to social affairs, it is recorded in the Dec. 8, 1921 issue, that St. Alban's W. A. had a sale of work which netted them \$335.00. The first curling game in the Pass that season was played for the Burns' trophy, when Mr. Beck and Sam Moores were the Coleman picks. The Coleman rinks won.

The Ladies Auxiliary of the Institutional church elected its officers as follows: Mrs. G. R. Powell, president; Mrs. Hugh Dunlop, vice-president; Mrs. Albert Short, secretary-treasurer.

The Women's Institute officers were Mrs. M. McLeod, president; Mrs. O. E. S. Whiteside, vice-president; Mrs. W. L. Rippon, second vice-president; Mrs. J. O. C. McDonald, secretary-treasurer; Mesdames D. K. Allan, Oimette, Haines, directors; Mesdames Morrison and Chaput, auditors.

The St. John Ambulance Association had a branch, which has continued since, with International mine team as follows: W. White, captain; R. Greenhalgh, R. Morgan, D. Robert and E. Kapakla. The secretary was D. Davies, mine superintendent. The report of the examination concludes with the paragraph that Colonel Hodgetts and Chief Hardy were entertained by the general manager of International Co., Mr. O. E. S. Whiteside.

There are many interesting

Important Notice

PROVINCIAL REGISTRATION

in all Pass towns will take place Wednesday, Thursday and Friday, August 12, 13 and 14. Notices will be posted in each town where registration will take place.

E. O. DUKE, M.L.A.
Rocky Mountain Constituency

Proposal to Oil Pass Highway

Highways Dept. Will Pay For Labor if Local People and Municipal Bodies Pay for Oil.

A proposal for public consideration was made by Mayor Pattinson to E. O. Duke last week, that if the provincial government would pay for the labor, the people of the Pass towns would pay for the oil to surface the highway between Bellevue and Coleman.

The cost of the oil would be borne by car users and others who felt the proposal was worthy of support. Complaint has been widespread about dusty roads, and this proposal, Mayor Pattinson thought, might offer a solution or remedy.

If it receives support, a meeting would be called to go into the matter more fully. Mr. Fallow, through Mr. Duke, stated the government is agreeable to the proposal. The cost of oil, it is reported, would cost about \$600 per mile, totalling \$4200.

Coleman Tennis Players Take Honors

Win Major Events at Southern Alberta Tennis Tournament at Lethbridge

Coleman tennis stars completely dominated the southern Alberta tennis tournament held at Lethbridge last week when they annexed the men's singles and men's doubles title with comparative ease.

Coleman's entries, Balloch, Shone, Roughhead and Jenkins, stroked their way to the semi-finals over other entrants from southern Alberta and then had to fight it out among themselves for the singles title.

Roughhead showed surprisingly good form to defeat Dick Hinkes of Calgary, seeded number one in the tournament, and then climaxed this achievement by defeating Dick Shone to advance into the final. Balloch meanwhile disposed of Jenkins and met Roughhead to win the final and his third southern Alberta title.

Balloch and Jenkins teamed together to win the men's doubles with little trouble, their hardest game being against Shone and Roughhead in the semi-final. They defeated two Lethbridge entrants in the final, 6-4, 6-2, 6-0. This is the first southern Alberta championship held by Jenkins.

Bill Wright accompanied the players to Lethbridge and acted the role of coach.

ANNOUNCEMENT

A. McVillie Anderson, eyesight specialist, of Calgary, will make his next visit to Coleman

FRIDAY, AUGUST 14th,
at the jewelry store of J. M. Chalmers, Coleman.

Over 20 years experience and regular visits to this town assure you satisfaction in all optical work.

Blairmore Greenhouses—We again remind you that fresh cut flowers, potted plants, bouquets, wreaths and floral emblems of all kinds may be delivered the same day as ordered. Telephone 96, or leave your orders at this store.

France Is Worried Over Complications In Spanish Civil War

Paris.—France's Socialist government, determined to pursue a middle-of-the-road policy in respect to Spain's civil war, announced French volunteers may fight across the border but must not carry arms on French soil.

Disturbed by the possibility of international repercussions from the flight of Italian planes to Spanish Morocco, the French cabinet held a prolonged discussion on the question of French national fighting in Spain.

The cabinet adopted provisions for the sheltering and feeding of Spanish refugees. It also approved a bill appropriating 10,000,000 francs for the protection and repatriation of French citizens in Spain.

Informers sources here said Spanish rebels commanders had placed a 20,000,000 franc aeroplane order with Italy. The correspondent of the newspaper Paris-Midi quoted General Francisco Franco, generalissimo of the Spanish rebels, as saying the insurgents never had placed orders for Italian planes or received any planes from a foreign power.

London.—The Manchester Guardian, discussing the report that five Italian planes crashed while allegedly taking munitions to the rebels in Spanish Morocco, says: "The international implications of such an event are grave. It is a distinct violation of international law for military or armed civil planes to fly over French territory. It has always been deemed international delinquency for a government to assist rebels against a friendly power."

"It seems almost certain," remarks the News-Chronicle, Liberal, "that some foreign powers at any rate are interested in the success of the rebel cause, which might lead to very serious international complications. This danger is certainly not lessened by deliberate attempts here to misrepresent the Spanish government by labelling the Spanish government 'Reds'."

"In the present case the facts are clearly that the Spanish government is a constitutionally elected government, as such our government should declare explicitly in favor of giving it every facility which international law allows. It should use all its influence to prevent other powers from intervention on behalf of the rebels. If that happens anything may happen."

Bishop To Visit Canada

Says He Is Coming To Visit His Numerous Relatives Here

London.—The Bishop of London, Right Rev. Arthur Winnington-Ingram, announced that he was sailing for Canada on the liner Queen Mary on Aug. 5 to visit his 34 nieces and nephews, great-nieces and great-nephews.

Jokingly he said he expected the prime minister of Canada to erect a marble statue to the Winnington-Ingram family for doing its part in populating the Dominion.

Dr. Winnington-Ingram has been a frequent visitor to Canada.

Canadian Freighter Rewild

Montreal.—The Canadian Leader, a freighter sold by the Canadian government to the Montreal-Australian-New Zealand line, has been resold by that firm to the Tower Steamship Company of London, Eng. The 5,492-ton ship, laid up at present at Halifax, will be reconditioned and taken across the Atlantic in the next few weeks.

United States Exports To Canada Show Heavy Increase

Ottawa.—The United States forged ahead in June as Canada's chief supplier of goods, it was shown in a report issued by the Dominion bureau of statistics, but the United Kingdom's exports to this country also rose.

The United States led all exporters to Canada with shipments in June worth \$33,994,850, an advance of 31 per cent over the \$25,911,997 worth shipped in June a year before. The United Kingdom, largest supplier among empire countries, boosted its sales in Canada from \$9,054,185 in June, 1935, to \$11,068,861, up 11 per cent.

Returning prosperity was believed

Naval Agreement Reached

Treaty Between Russia And Britain Ready For Signatures

London.—An Anglo-Russian naval agreement "on all points" has been announced at the admiralty.

No date was set for signing the treaty, but it was stated to be completely drafted.

All that remains to be done, officials said, is to inform other powers which are parties to the Washington naval treaty, including France, Italy, the United States and Japan, and other governments with which Great Britain is now negotiating bilateral treaties.

The object of the Anglo-Russian agreement, it was stated officially, was to obtain Soviet adherence to the principles of the recent tripartite London pact between Britain, the United States and France.

This accord provides for limitation of tonnage in different categories but not of the number of ships and for an exchange of building information between signatory powers.

May Buy Cattle

Nova Scotia May Replenish Herds With Western Canadian Livestock

Halifax.—Hon. John A. McDonald, Nova Scotia minister of agriculture, said that the government had under consideration a plan to replenish the province's depleted herds with cattle from Western Canada's drought lands.

"Cattle have been materially reduced in this province, especially in the eastern portion from the drought of two years ago and a smaller-than-average crop last year," said Mr. McDonald.

"We could pay as much as the abattoirs for the cattle, and if we could get the freight rates down it might prove of some benefit to our farmers," he added.

Mr. McDonald said Nova Scotia had prospects of the largest hay and forage crop "in many years" and desired for more cattle had been expressed by many farmers.

Was Noted Stock Expert

Manager Of Royal Winter Fair Dies In Toronto

Toronto.—Alexander P. Westervelt, 64, for 14 years manager of the Royal Winter Fair and an outstanding Canadian live stock expert, died in hospital here after a brief illness.

For the past 20 years he had lived at Clarkson, a few miles west of Toronto, where he operated a small farm as a hobby.

Mr. Westervelt collapsed at his desk while engaged in making preparations for the forthcoming winter fair.

Since its inception in 1922, he had been the guiding spirit of the Royal Winter Fair and he was responsible for many of the innovations that caused the fair to grow from year to year and attract exhibits from coast to coast.

Urges Help For Defence

Bristol, Eng.—Stanley M. Bruce, Australian high commissioner in London and former prime minister of the commonwealth, in a speech here, urged that the British dominions make a larger contribution toward the defence of the Empire.

U.S. Wheat Shortage

Will Necessitate Importation From Canada Says Secretary Wallace

Washington.—A shortage of hard wheat in the United States would necessitate some importation from Canada, Secretary of Agriculture Wallace told a press conference. He declined to predict how much wheat would be brought in from Canada but called attention to predictions in trade circles of about 40,000,000 bushels.

Indications were the United States would have a wheat crop approximating the domestic demand other than the shortage of hard wheat. There would be a surplus of soft white wheat in the Pacific northwest, he said.

Possibility the country might have its smallest corn crop since 1881 was cited by Wallace as the current drought pushed the agriculture department's price index on farm products to the highest level since September, 1930.

Wallace said the corn outlook was by no means definite yet. But he did stress that the agriculture department mentioned the possibility of sizeable corn imports from the Argentine and elsewhere.

Obtain Leave To Appeal

Privy Council Grants Petition Of The Canadian Government

London.—The judicial committee of the privy council has granted the petition of the Canadian government for leave to appeal to that body concerning the validity of several acts dealing with labor and employment passed by the Bennett government last year.

C. P. Plaxton represented the Dominion government. Ontario and British Columbia joined in petitioning for leave to appeal. Attorney-General Roebuck represented Ontario and J. E. de la Farris the Pacific coast province.

The Dominion petitions concern the validity of the act providing for one day's rest in seven; the act providing for a 48-hour week; the Minimum Wage Act and the Employment and Social Insurance Act. The supreme court of Canada held the first three of these partly valid and the last one unconstitutional.

King George Memorial

Sultan Of Johore Has Contributed \$25,000 To Fund

London.—A contribution to the King George Memorial fund of \$5,000 (\$25,000) from the Sultan of Johore was announced. The contribution was sent on behalf of the sultan, his people and his government in token of their gratitude for the many great benefits received from the late king's protection during his reign of 25 years, said a message accompanying it.

The fund is now near £200,000 (\$1,000,000).

Visit War Cemeteries

Arras, France.—Sir Robert Borden, wartime prime minister of Canada, accompanied by Col. Frank Higginson, chief administrative officer of the Imperial war graves commission, and Col. H. C. Osborne, Ottawa, secretary of the Canadian war graves commission, toured soldiers' cemeteries and memorials amid the battlefields of France and Belgium.

MAY RESIGN

E. G. Odette, Ontario Liquor Commissioner, who, it was reported, will soon resign his position on account of ill-health.

Build More Ships

Britain Plans Construction Of Two New Battleships

London.—Plans for construction of two new battleships included in the 1937 naval rearmament program were announced in the House of Commons by Sir Samuel Hoare, first lord of the admiralty.

Sir Samuel said construction would begin in January, 1937, with final details as to the cost to be negotiated later with the contractors.

"Arrangements for laying down these ships," the first lord told the commons, "are being made in full accord with the declared policy of His Majesty's government to press on with naval replacement and the new construction program with all possible speed."

The five-power Washington naval treaty with its limitations on defence, lapses at the end of this year and a tri-power accord comes into effect.

Under its wide latitude is provided the signatories—Britain, France, and the United States—with the proviso they exchange information on plans before construction is begun.

Japan is not a signatory of the new pact.

Sixteen-inch guns will be used on the new warships, under tentatively announced plans, in the hope other countries will follow with the same sized pieces.

Orders for the new men-of-war were given to Vickers, Armstrong, Ltd., at Walker-on-Tyne and the Cammell Laird Co., at Birkenhead.

World Poultry Congress

Canada's Exhibit Of Plymouth Rocks Is Featured

Leipzig.—A feature of the exhibition attached to the sixth world poultry congress in session here in a Canadian exhibit of Plymouth Rocks of a new breed which can be easily raised in cold climates.

The Plymouth Rocks form part of a large Canadian exhibit of all types of poultry. The United States, Belgium, France, Holland and Denmark also have large exhibits.

Representatives of 42 nations are attending the congress. There was a ready market for the Plymouth Rocks at prices as high as 150 marks (\$60). Swedish and Finnish breeders were especially interested.

SIR SAMUEL HOARE VISITS DEFENCE

Sir Samuel Hoare, recently appointed First Lord of the Admiralty, paid his first official visit to the Fleet recently when he flew from Hendon and alighted on the deck of the aircraft carrier "Courageux", which was cruising off the Isle of Wight. Above we see Sir Samuel after his plane had landed on the boat.

The Lowest Wheat Carryover In Eight Years Is Reported

Employment Gain

Shown To Be On Upgrade In Five Economic Areas

Ottawa.—Employment is on the upgrade in Canada, and each of the five economic areas showed a gain in the number at work on July 1 compared with June 1 and also in comparison with July 1, 1935, according to a report issued by the Dominion bureau of statistics.

Of the eight cities for which figures are available increased activity was shown in Toronto, Ottawa, Hamilton, Winnipeg and Vancouver, while Montreal, Quebec and Windsor, Ont., showed declines.

Reports from 9,744 employers show 987,955 persons at work on July 1 compared with 963,401 the preceding month. On July 1, last year, 9,323 reported 934,262 employed. The gain of 24,554 was the biggest increase between June 1 and July 1 in the preceding years.

Contrary to the usual trend at July 1, employment in manufacturing showed advancement over the previous month with most of the gain recorded in the food, lumber and pulp and paper groups. Mining, with the exception of coal, communications, transportation and construction and maintenance also showed considerable improvement.

All the increases, with the exception of that in construction, exceeded the average gains from June 1 to July 1 for the past 15 years. At the same time seasonal declines were recorded in logging, and in the factory group recessions were shown in leather, textile and iron and steel plants.

Has Chartered Yacht

King Edward To Cruise Along Dalmatian Coast For Few Weeks

London.—King Edward has chartered the yacht Nahlin for a three or four week's cruise along the Dalmatian coast, it was announced at Buckingham palace.

The king will probably join the yacht in about 10 days at Dubrovnik, Yugoslavia. He will be accompanied by three or four friends.

The vessel is the property of Lady Yule, widow of Sir David Yule, former Anglo-Indian merchant. It is a twin screw schooner, originally costing \$1,500,000, and is registered from Glasgow.

The cruise will replace a projected vacation at Cannes, France, which was cancelled after the outbreak of the Spanish rebellion.

Ontario's Wheat Crop

May Be Larger Than Last Year Is Prediction

Toronto.—Despite drought conditions, Ontario's wheat crop will likely be from 2,500,000 to 3,000,000 bushels larger than the 3,000,000 crop of 1935, C. H. Carlisle, president of the Canadian Bread Company, told shareholders at annual meeting here.

The current Canadian crop, he said, would probably total 250,000,000 bushels.

With the 125,000,000 bushels carried over from last this would make the amount of wheat available equal or greater than the average Canadian crop of 350,000,000 bushels.

Ottawa.—Canada ended the 1935-36 crop year with the lowest wheat carryover in eight years and indications its current crop of the golden cereal will be the smallest in 12 years at least. As drought continued to scorch the prairie granary farm authorities estimated the carryover at between 110,000,000 and 115,000,000 bushels and this autumn's harvest at less than 250,000,000, a figure below those of all intervening years since 1924 when farmers reaped 235,686,000 bushels.

Declaration that the current crop would be considerably less than 250,000,000 bushels came from Dr. E. S. Archibald, director of experimental farms, in a pronouncement at Fredericton. Some private estimates placed the condition of the crop this week at 41 per cent of normal which would mean a harvest of only about 135,300,000 bushels.

Although no official survey figures were available reports on crop conditions indicated the vast area of parched and drifted lands, estimated in 1934 at a total of almost 8,500,000 acres for the three prairie provinces, were becoming enlarged.

Mr. Archibald was reported as having said the drought was the worst in the history of the prairies. The Dominion bureau of statistics in its last crop report described conditions as constituting a major disaster. In the extreme drought areas, it was said, farmers would have no marketable crop. In 1934 they produced less than five bushels per acre.

Exports of Canadian wheat were estimated at about 220,000,000 bushels for the crop year, the highest figure since 1933 when 240,136,568 bushels were shipped out of the country.

The situation brought bright prospects that holdings of the Canadian wheat board, most of the visible supply, would be sold before next year, but it blackened the outlook for thousands of prairie farmers, some of them distraught by drought for several years.

No word came from the government regarding possible fixing of a new minimum price for wheat, but the Canadian grain board announced at Winnipeg the price of 87½ cents a bushel last year will be continued until the administration reaches a decision on a new price.

With wheat selling around the \$1 mark farmers will not offer wheat to the board but should the price again drop below 87½ cents they will be protected to the extent of the spread between that figure and the market price.

Heavy Loss

Says Drouth Loss In Western Canada Greatest In History

Fredericton, N.B.—Drouth loss in western Canada this year was the greatest in the history of the Dominion, Dr. E. S. Archibald, director of Dominion experimental stations in Canada, declared here.

Considerably less than 250,000,000 bushels of wheat would be harvested this year as compared to normal crops of 350,000,000 bushels for the past few years, he predicted. Loss from hail was mostly local and rust damage was small compared to last year. Stock breeders and ranchers would suffer greatly, he said, because of exceptionally heavy losses in both forage and coarse grain crops.

Combined Opposition In Manitoba Given As Thirty Seats

Winnipeg.—Further ballot counting in the Manitoba election brought the combined opposition strength in the legislature to 30 against a total of 21 government candidates elected.

With two seats in doubt and two with deferred voting Premier John Bracken and his Liberal-Progressive followers were definitely placed as the largest group in the next legislature but well short of a working majority. Second largest group was the Conservatives with 16 members.

Re-election of Mr. McLaughlin in Kildonan-St. Andrews had been almost a foregone conclusion for he had piled up a substantial lead on the first count over C. E. Fillmore, Liberal-Progressive. The final count gave Erick Willis, youthful newly chosen leader.

Candidates declared elected on later count were James McLaughlin, in Kildonan-St. Andrews, and G. Renouf in Swan River, Conservative; H. F. Lawrence in St. Boniface, C.C.F., and H. H. Wright in Emerson, Independent.

The party lineup was: Liberal-Progressives, 21; Conservatives, 16; C.C.F., five; Independents, three; Communist, one, and Social Credit, five. Liberal-Progressives were leading in one of the two remaining seats, C.C.F. in the other.

Speculation as to a possible alignment of Liberal-Progressives with one of the smaller groups was rife but the government gave no indication as to its plans.

Looking Backward

(Continued from Page 1)
items in these old copies of The Journal, and though it is only comparatively speaking a short time ago, yet time has wrought many changes. It is pleasant to look back on these days and recall many neighborly incidents of good will and friendship, and doubtless readers of The Journal far afield as well as those still living here will read these few extracts with keen interest, and recall many other happenings of 15 years ago.

It might be pointed out that Coleman had weekly newspapers prior to 1910, but through changes of ownership, old files have all been lost or destroyed, though some of the old time residents may have copies on hand. For several years the town was without a newspaper, till Mr. Dunning established The Journal in 1921. He passed away several years ago, and his wife established and operated a paper at Ladner, B.C., known as The Optimist.

When a Depression Is Over

A BUSINESS depression is over when the majority of people get weary and hungry from waiting for the President of the United States and Congress and the business leaders to show them the way back to prosperity. A depression is over when it is no longer fashionable to admit that you're broke.

A depression is over when the majority say to themselves, "I've got to find my own way out of this."

A depression is over when people quit talking, wondering, and wishing, and face realities. They make adjustments for the inevitable. Slowly the cycle turns upward.—Whitsitt Impressions.

LOCAL AND GENERAL

Buck Eyesacker landed a fine 2½ lb. fish in Milk River on Sunday, and was greatly surprised on pulling it from the water to find it was a 2½ inch pike. He wondered what he was pulling from the depth when he first got a glimpse of it, and imagined it was a young shark. In the lower reaches of the Alberta rivers pike are frequently caught, but none have been reported in this district.

Coleman Homing Society's first race for young birds, 1936, from Fernie to Coleman on Aug. 1, resulted in A. Beigem's bird winning, and Fred Beddington's second.

NOTES AND COMMENTS

AN IMPRESSION has been created that Prosperity Certificates cost only 2 per cent per year. Some with a blind eye cannot figure that all the time they are in circulation till redemption in two years time, they cost one per cent per week, and that the money which redeems the certificates is paid by the people in the form of stamps purchased from the government. To make it as plain as possible the government prints say two million pieces of paper, which cost no more than the paper and printing and distribution. The public immediately begin to pay their own cash towards making these pieces of paper valid to the value of one dollar each, and at the end of two years will have paid in by the purchase of stamps sufficient to redeem the certificates. In other words they contribute through a stamp tax two million dollars.

DISCUSSION a-plenty has ensued over "Prosperity Certificates." This substitute for currency issued by Alberta government as money, does not represent coin or bullion, but is made legal tender in Alberta by legislation of Premier Aberhart's cabinet. The legislative members did not have a chance to vote on it, except to give the cabinet power to bring in Social Credit. Prosperity certificates were devised after the house adjourned. Approximately \$3,300 is to be paid, or has been, to road workers in Rocky Mountain. This will likely be presented to storekeepers at Bellevue, Hillcrest and Blairmore.

A PROMINENT storekeeper (not in Coleman) informed The Journal he would accept a limited number for merchandise, and send them to his wholesalers. If they would not accept them, he would be unable to accept any more. He could not afford to hold them indefinitely. Coleman merchants apparently will not be asked to accept them, as relief work at the airport is being paid in Dominion government cheques, the miners are paid in Dominion currency, and the only other outside money coming in for payrolls is for the bank, post-office and C. P. R. employees. Therefore Coleman merchants will not be perplexed over the question --to accept them or not? Some retailers in other Past towns and Pincher Creek have expressed their fear of a boycott if they do not accept, a very undesirable condition to face, and one which is almost unbelievable in a Canadian province, or any British country. Banks, post-offices and the C. P. R. will not accept fiat money under any conditions.

THE COVENANT which is part of the registration form for basic dividends contains a clause: "To make no claim or demand at any time, for payment in Canadian Currency, of Alberta Credit held be me." The deduction to be drawn from this is that the signer agrees to take the risk of the government not being able to make good its credit. In return the government agrees "To redeem, where possible, Alberta Credit with Canadian currency, for the purpose of allowing the member to take up residence outside the province or for other essential requirements."

Therefore should a man hold \$500 or \$1000 in Alberta credit, and find it necessary to move outside of the province, it is problematical if he could exchange it for sound money, for the covenant expressly states the government will redeem it, where possible. Should there be a heavy demand for exchanging Alberta Credit for Dominion Currency, the situation might prevail as now exists in regard to Alberta Savings Certificates. The covenant speaks for itself, and a rule of good business principles is to consider the terms and possibilities of what may happen before you sign a document.

DOUBTLESS those who have very little or nothing will sign these registration forms because there is a chance of getting a basic dividend, as that was the main enticement to vote for a Social Credit government. But those who have by thrift accumulated a stake to take care of advancing age will consider more carefully before entering into a covenant which really guarantees nothing in return for what they pledge. Mr. Aberhart, two years ago, admitted he did not know what the government would have for a standard of value behind its "non-negotiable certificates," of which much was said prior to the elections, and apparently from which has developed the idea of Prosperity certificates, which the people of Alberta themselves will redeem by the stamp tax of \$1.04 for every dollar certificate issued. The certificates certainly do not constitute a loan. To make them good Alberta citizens must pay with Canadian Currency. That's the plain truth!

TWENTY-TWO years ago on Aug. 4 British soldiers went to France to advance on Mons, Belgium. They went up there singing "It's a Long Way to Tipperary," with the light-heartedness characteristic of Tommy Atkins. Some wrote home to relatives: "We'll be back by Christmas." Instead, they made a forced retreat from Mons and finally made a stand at the Marne. Less than one year later regiments which had gone out with 1100 men were nearly wiped out,

Local News

Mr. and Mrs. Clarence Huffman are visiting friends at Trail.

Mr. and Mrs. D. Webster were Calgary visitors for a few days.

Miss Peggy Fairfull of Calgary is the guest of May Bell at the Grand Union this week.

Mr. and Mrs. J.O.C. McDonald are spending their holidays at Vancouver.

Miss Marjorie Bagnall of Calgary is visiting Miss Irene James for a few days.

Margaret Robert, nurse-in-training at Royal Alexandra hospital, Edmonton, is home on vacation.

Mr. and Mrs. George Hope are expected home this week from two weeks holidays in Vancouver.

Frank Creeggan left Sunday for a short visit at Lomond where Mrs. Creeggan is visiting her parents.

Miss Belle Flynn of Mount Royal College staff, is spending two weeks holidays at her home here.

The interior of B.C. Cafe has been made more attractive with a fresh coat of paint and other decorations.

Mr. and Mrs. D. Davies of Edmonton, and Mrs. J. Simpson and Kathleen of Bow Island, are visitors at the home of Mr. and Mrs. F. A. Cox.

Nick Caput, employed in International mine, was injured by a piece of rock falling on his head in B. level on Monday at about 2.15 p.m., and was taken to hospital.

Postmaster Frank H. Graham left on Tuesday on a few thousand mile auto trip to San Francisco and return, and accompanying him was his son Donald. Doubtless they will enjoy the experience of travel and the sights to be seen in the larger cities which they will visit.

A fishing party went out last week to the North Fork, including Frank Creeggan, "Bill Jenkins, Angelo Gentile and a friend named Spottiswoode. Just what they caught has never been told, for they came home very quietly and so far they have not told whether they caught trout, pilywogs or just suckers.

Mrs. W. J. Bartlett of Blairmore, went to Calgary on Tuesday to meet her daughter, Miss Celia Law, of London, Eng., who will visit for a week or two in Alberta before continuing her journey to Shanghai, to visit relatives. She will spend some time in Blairmore, and later will return to England.

ly got his "picture in the paper,"
by qualifying for the Macaulay
Club gathering at St. Andrews-by-
the-Sea, New Brunswick. It ap-
peared in the Lethbridge Herald.

INDEPENDENCE OR NOTHING

WITH the aim to live on in service through the
span of many lifetimes, to what can a newspaper
bind its policy so that it may endure in strength
and grow in the respect of its readers. Movements
spring up like mushrooms over night and wilt in
a day. Governments have their brief years of
power and pass into the limbo of forgotten things.
Companies and corporations wax and wane with changing
policies and changing hands.

TO none of these things can a good newspaper be fettered.
It is larger than all. It must have a longer view, a broader
scope, a deeper inspiration. It is not a voice for the opinions
of the few but a faithful echo of the great voice of the
people.

It must be free, it must be independent, to grow with the
upward-striving national mind and to interpret faithfully
the wishes of its citizens. Independence—or nothing. In-
dependence is a newspaper's very life. Preserve that free-
dom of the press and you keep a safeguard to your own
liberty.

By all means form your own opinions, from unbiased
news columns. Your right to say what you think, your
right to criticize freely—all those rights cherished by a
free people are upheld by the independent newspapers
of Southern Alberta.

MIDSUMMER MOTORING CLIMAX

To celebrate the peak of the season, dealers from all
parts of Central Canada gathered at the Hudson plant of
Hudson Motors of Canada in Tilbury, recently, and, with
due ceremonies, drove away a fleet of nearly 100 new Hud-
sons and Terraplanes. Photos show: Top, a section of the
driveaway taken from the air; Lower Left: Essex Kilties
Band piping the motor cavalcade through the streets of
the town; Lower Right: Ross Mackinnon, vice-president
and general sales manager, pitching the first ball in a
Kent League baseball game which was part of the cele-
bration.

New Locomotives Poems in Steel

Canada's newest railway locomotives are poems in steel, graceful, light-weight, semi-streamlined,
machines capable of 110 miles an hour.

Radical departures in construction have been made in the Canadian Pacific Railway's five new
"3000" engines, the first of which was taken over on Monday, July 27, at a brilliant ceremony which
was broadcast on a nation-wide radio net-work through the facilities of the company's Communica-
tions Department, and which included addresses by Sir Edward Beatty, G.B.E., K.C., L.D., chair-
man and president, Canadian Pacific Railway; His Worship Mayor Camille Houde of Montreal;
William C. Dickerman, president of the Montreal Locomotive Company, where the new locomotive was
built; and J. N. Burke, Canadian Pacific veteran.

The new Jubilee Locomotives, so named because they will go into operation in the jubilee year of
the company's transcontinental passenger service, will pull a completely new type of train, lighter
than the ordinary, semi-streamlined, and comfortable. The new coaches are under construction.

WORLD HAPPENINGS BRIEFLY TOLD

A delegate to the conference of the Royal Institute of British Architects prophesied that one day 15 liners the size of the Queen Mary might be in dock at Southampton.

T. H. Cunliffe, 65, assistant financial editor of the Montreal Gazette since 1919 and advertising manager for 21 years prior to the Great War, died in Montreal recently.

A confectionery firm in Sheffield, England, was fined \$8 for working an 18-year-old girl 7½ hours a week for a wage of \$3. She was not allowed proper intervals for meals.

Fred R. Goodwin, who had only five hours' "solo" experience when he started, arrived at Croydon, England, after flying to India and back. His wife accompanied him.

Three women magistrates were on the bench at Eastbourne, England, and heard a number of motoring cases before they were joined by a male colleague.

A 7,000-mile three-minute telephone call—between South Africa and Sweden—was made recently. It was believed the first commercial phone conversation between the two countries.

Drouth has taken heavy toll of wild life in Alberta, says J. Selby Walker, founder of Calgary's bird sanctuary. Thousands of young ducks have died as small lakes and sloughs dried up, he said.

Jack pine growing over thousands of acres of Manitoba forest lands is threatened with destruction by an invasion of spruce bud worms which are stripping the trees of foliage. Col. H. I. Stevenson, forestry branch director, stated.

The largest private nursing home in the world is to be built in Johannesburg, South Africa. It will cover about one-quarter of an acre and accommodate 250 patients, 30 more than the next biggest home, in New York.

First Visit To Britain

Maharajah of Mysore Making Unofficial Trip To London

The Maharajah of Mysore, whose fortune is estimated at \$50,000,000 (\$400,000,000) and who neither smokes, drinks nor eats meat, is visiting London.

A room in the Indian prince's hotel was prepared as a temple for the worship of the Maharajah's goddess, Chamundewari. A small golden figure of the goddess had been placed in the room, and priests accompanying the Maharajah will perform daily rites.

This is the Maharajah's first visit to Great Britain, and, indeed, his first departure from his own kingdom since his accession at the age of 11 in 1895.

His visit is unofficial, but he almost certainly will be received by the King who visited him in 1922 as Prince of Wales. At that time the Maharajah beat the Prince at squash.

The Maharajah was greeted at the station by representatives of the government and of the India office. He was accompanied by a retinue of 80. After a short trip to the continent the party will return to India in September.

Should Hold Seed Wheat

Alberta Farmers Warned Against Excess Marketing Across The Border

Alberta farmers were warned by Hon. W. N. Chant, minister of agriculture, against the excess marketing of seed wheat across the international border despite the lure of premium prices there.

He also advised farmers in sections of the province where there might be a feed shortage to conserve their supplies as much as possible.

"It has come to the notice of this department that wheat is being marketed by truck across the border where the premium has reached a substantial amount," said Mr. Chant.

"It would be wise for farmers in the dry area to retain sufficient grain for seed as the policy for the coming season will not permit the distribution of relief seed grain in cases where farmers have threshed grain that is suitable for seed," he added.

New Ceramic Process

One Of The Few Advances Made In This Art In 3,000 Years

A new type of porcelain, its surface done by "nut frost," one of the few advances in 3,000 years of the ceramics art, was announced at the color conference at Massachusetts Institute of Technology.

The "nut frost" is real. It is metallic, formed when metals freeze at temperatures around 2,000 degrees Fahrenheit. The metallic frost has all the patterns of frost on the window pane, and can have all the colors of the rainbow.

The metallic frost is lustrous, its surface smooth. Unlike the frost on winter windows, the metallic kind can grow crystals of any size. It resembles pictures of flowers painted in metal.

The new ceramic was developed at the Massachusetts Institute of Technology, in the laboratory of Professor F. H. Norton, who described it to the conference. It grew out of new methods of controlling precisely one of the four standard processes of making ceramic colors.

This old process produces color by formation of crystals just under the surface glaze. The substances which make the crystals, Professor Norton explained, may not in themselves possess any color. The shape of the crystals and the materials forming them, combine to absorb part of the light, leaving the rest to the rays to be reflected as brilliant color.

South Africa Takes Census

Used Old Method Of Cutting Notches On Sticks

The old untutored method of tallying by means of cutting notches on sticks was one of the unusual features in the general census of South Africa, held recently.

Heads of families in Zululand were instructed to congregate at the nearest dipping tank (these tanks are used for the eradication of ticks in cattle) for the purpose of counting all those related to them.

They brought to the enumerators sticks, on one side of which were carved notches corresponding to the number of males and on the other to the number of females in the family.

This method of counting has been in use for years with raw natives who desire to keep a check on the number of days they work for a white employer.

More than 8,000 enumerators were engaged for the census, which is the first taken for 10 years, and although the motor car was largely used for transport in the outlying districts, the horse, donkey and even the old Cape cart were found necessary in some parts where roads do not exist.

Had Narrow Escape

Aviator Struck High Tension Wires Carrying 70,000 Volts

Lost in the fog of a violent storm a British amateur pilot, Mr. Phil Avery, when taking an aeroplane for delivery at Basle, Switzerland, struck and severed the high-tension wires over Belfort Fortress, on the French frontier. The wires were carrying 70,000 volts. Mr. Avery miraculously escaped uninjured and safely landed the crippled aeroplane.

One Thing Lacking

Not for the first time the Englishman was belittling Scotland and everything to do with it. As he drained his second glass of whiskey he turned to his companion.

"Why," he said, "your country has never produced a really great man. You say Walter Scott? Pshaw! If I had a mind to do it, I could write as good stuff as ever Scott did."

"Ay, ye're right there," replied the patient Scot. "All that ye want is the mind."

Old Sheet Copper Found

A small cylinder of sheet copper believed to have been left by Captain James Strange when he took possession of the Queen Charlotte Islands for Great Britain 150 years ago, has been uncovered on one of the islands. W. M. Ballay, authority on the north midcoast region of the Queen Charlotte, and B. A. McKelvie, Victoria newspaper editor, reported the find on their return to Victoria with the cylinder. 2162

THAMES-SIDE MEMORIAL TO KING GEORGE

For some months, unknown to the thousands passing along the Thames Embankment, workmen have been busy behind a wooden screen under the Water Gate Arch, erecting a memorial to the late King George V. The monument, designed by Sir Edwin Cooper, was commissioned by the Port of London Authority. It is to commemorate the name "King's Reach" which was given to the stretch of the Thames between London and Westminster Bridges, on the occasion of King George's Silver Jubilee. Lady Ritchie unveiled the memorial, and we see her above with Lord Ritchie standing on the deck of a launch after the unveiling ceremony.

Long Arctic Flight

Soviet Pilots Cover 5,858 Miles Without A Stop

A long Arctic flight by Soviet pilots was hailed in the official press as an accomplishment which "will confuse our enemies."

Moscow newspapers described the plane trip of Pilots Chkaloff and Baidukoff as one of the most difficult ever made.

(The flyers, accompanied by Navigator Belakoff, spent 56 hours and 20 minutes in the air and landed near Nicolaelevsk, Siberia, after covering 5,858 miles without a stop.)

Their plane, it was disclosed by the commissariat for heavy industry, which sponsored the trial, was only brought to earth when they were threatened by head winds and a gasoline shortage.)

On recommendation of high Soviet officials, the three men participating in the flight are to be awarded the title of "heroes."

In recognition of their accomplishment the flyers also will receive cash grants from the government.

Glider Touring Japan

To Arouse Interest In That Type Of Aviation

To arouse interest in glider aviation, a German glider, manned by a well-known Osaka pilot, is touring Japan. It is being towed by an airplane and is covering 2,500 miles in its flight, which touches all large and many small cities. The glider is practically identical with the one used by Wolf Hirth, the German master pilot who coached Japanese glider men last year. It is the best machine of the kind in the country except that owned by army air forces.

Perpetually Honored

Saskatchewan Lakes May Carry Names Of Victoria Cross Winners

Four Saskatchewan men, winners of the Victoria Cross during the world war, are going to be honored perpetually by having names of as many northern lakes named after them, according to Hon. W. F. Kerr, minister of natural resources.

Mr. Kerr has made recommendation to the geographic board of Canada that the following lakes be named:

102—Zengle Lake—After R. L. Zengle, who won the Victoria Cross while serving with the 5th Battalion—a Saskatchewan unit.

108—Calma Lake—After the late High Calma, formerly of Saskatoon, who won the Victoria Cross while serving with the 46th Battalion.

109—Mullins Lake—After Henry Mullins of Mooseomin, Saskatchewan, who won the Victoria Cross while serving with the Princess Pats.

114—Combe Lake—After the late R. G. Combe, formerly of Melville, Saskatchewan, who won the Victoria Cross while serving with the 27th Battalion.

Back From Nature

Members Of French Nudist Colony Now Wearing Clothes

"Nudists at the French 'Naturalist' colony on Helopoli Island, in the Seine, about 25 miles from Paris, have returned to clothes. Only babies under three are to be allowed to go entirely unclothed. On the island are hundreds of tiny tents and small cabins, which were erected by the 'back-to-nature' colony. The nudists now wear more than is usually seen on bathers at fashionable seaside resorts.

Kittens at Play in Dainty Crochet

When you take Baby for his airings, bundle him in with this adorable carriage set—pillow and cover! You'll find it easiest of the easy to do, in just plain crochet, and most appealing in white with blue or pink, or in two shades of one color. It's glorious fun to watch those playful kittens appear one by one, as the simple stitches mount up. Use Germantown wool, for it's both lightweight and warm. In pattern 5672 you will find complete instructions and charts for making the set shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winthrop Newspaper Union, 175 McDermott Ave., E., Winnipeg.

There is no Alice Brooks pattern book published

SUNDAY SCHOOL LESSON

AUGUST 9

SAUL CONVERTED AND COMMISSIONED

Golden text: I was not disobedient unto the heavenly vision. Acts 26:19. Lesson: Acts 9:1-31; 22:3-21; Galatians 1:11-17; 1 Timothy 1:12-17. Devotional reading: Isaiah 6:1-8.

Explanations And Comments

The Persecutor Becomes a Convert. Acts 9:1-19. But, while Philip and other disciples "suffered abroad" were busy in extending the kingdom, Paul with equal zeal was persecuting the Christians at Jerusalem. He was "breathing threatening and slaughter against the Christians." We are told; he lived, as it were, in an atmosphere of hatred, fury and destruction. "The words 'breathing out' are expressive of a deep, agitating emotion, as when a man breathes more rapidly and even violently in order to supply the oxygen needed to supply the exhausted vitality consumed by the emotion. It is thus expressive of violent anger" (Albert Barnes).

As Paul was approaching Damascus there suddenly shone round about him a dazzling light, brighter than the Syrian sun. He fell to the earth and heard a voice calling him "Saul, Saul, why persecutest thou me?" "Who art thou, Lord?" he questioned, and heard the solemn answer came, "I am Jesus whom thou persecutest; but rise and enter the city, and it shall be told thee what thou must do."

Before Paul found the new life as a warm-hearted believer must be found who would go to him sympathize with him, and lead him into the fellowship. It took courage for a Christian to face the man who had come to put the Christians to death, but such a man was Ananias, a devout man according to the law, well reported by all the Jews that dwelt at Damascus (Acts 22:12).

Paul was the leader of the little Christian Church at Damascus. He is known only for his service to the great apostle Paul when Paul was in sore need of a brother. Ananias met Paul in a house in the street of Damascus called Straight, and when he saw and talked with him he knew that fears were needless. Paul put his hands upon Ananias, and called him with gentleness "Brother Saul," saying, "The Lord hath sent me that thou mayest receive thy sight and be filled with the Holy Spirit." Ananias opened Paul's eyes. He baptized him. He blessed him.

No word ever came to Paul at a more critical time. A hand held out, a brotherly word, who can tell what it meant to him and to the movement that was to carry the gospel to the regions beyond?

Self-Sufficiency Program

Russia Now Intends To Buy Less And Sell More

Russia's heretofore is going to buy less and borrow less and sell more and save more—towards the goal of self-sufficiency.

Furthermore, Foreign Trade Commissar Archibald Rozenzweig told the conference for foreign trade that it is his intention to send so many Soviet salesmen abroad—the buyers are flocking to Moscow.

The reason for the self-sufficiency program, he asserted, is clear: "In the present period of increasing military dangers, the necessity to prepare for defence and the significance of increasing gold reserves is apparent."

"Reduction of imports will be continued and intensified" during the third and current five-year plan by which Soviet Russia expects its future, Rozenzweig said. He added, "We hope to get along almost without imports."

High Salaries

Many Big Industrialists In United States Receive Huge Pay

The Toronto Star cites five big industrial men in the United States with salaries of \$200,000 per year and over, and nineteen others with salaries of over \$100,000 per year. In all cases, the high pay is the reward for assembling thousands and hundreds of men into an organization of production, competitive with the world, and it is a highly debatable point whether the salaries of such men are justified when compared with standard wages in industries which provide them. Comparatively movie and baseball stars are paid more and contribute no effort for the employment of large numbers of other people with dependent families. The system of high reward for creative effort and exceptional skill may be all wrong, but where is the better system to replace it?—St. Catharines Standard.

Australian Aborigines

Aborigines are becoming as scarce in Australia as Indians in the United States, according to the latest census returns completed at Canberra. These show that there still remain only 60,000 full-blooded aborigines in the country, of whom 24,000 were either in employment or were living in an organized camp. The remaining 36,000 are nomadic.

More than 7,000,000 members are enrolled in athletic clubs in Ger-

Some Strange Foods

Unusual Things Found By Those Who Search For Them

Snails are not exclusively a French dish. They have been eaten for generations in Swindon, Wiltshire, where, even now, they are lucky, you may find a dish on the public-house bar counter.

Stranger menus can be found by those who search for them between Land's End and John o' Groat's.

In Radnorshire they eat rabbits and fishes' eyes, while epicures who can afford trout's cheeks find it takes fifty fish to fill a small saucer with this delicacy.

Brown Geordy, a North of England sweetmeat, is made from bran, while Cornish pasties and pichard pie complete with the neighboring Devonshire quab pie, in which apples, mutton, onions and pastry are the ingredients.

Candied rose leaves, nettles in salad and rowan tree berries, which look so poisonous but make wonderful jelly, and cockles and cream with thunder and lightning for first place of favor in many homes. The latter is made from treacle and Devonshire cream.

Salted eels, spotted dog, and toad in the hole are everyday dishes everywhere, but in Wales and Ireland they eat seaweed and sea-slug soup.

The names "Singin' Himmy" and "Fat Rascal" are just aliases for thick cream and milk.

Ice-cream dipped in hot chocolate is an American invention which made a fortune for its sponsor.

Sturgeon, the royal fish which is so rare, is imitated in many places. Just bones, ivory brood in wine, vinegar and cornmeal.

In remote parts of Scotland and Ireland they eat sea-slugs and get rid of the fishy taste by leaving them overnight stuffed with onions. When the onions are removed the fishy flavor is gone.

Despite all these strange dishes, we still have a long way to go to compete with lion chow, as once eaten by the King and the Duke of Gloucester on safari.

And one more gourmet once sat down to a banquet of antelope cutlets, bear steaks, ostrich egg omelet, curried locusts and parrot pie.

Odd Uses For Electricity

One Of Strangest Is Lighting Of Duck Farms

The farmer and the electrician have found many uses for electricity in lighting laborers. Current is now used to heat, cook, furnish light and power, destroy insects, cut grain and even to keep vegetable crops from freezing.

One of the strangest uses of electricity is in the form of a griddle an extra good supplemental food for hogs. To cook these over an open fire was a chore. Labor costs were high. Electricity cooks them at 10 cents per hundredweight in an electric cooker.

A southern farmer found that water in a creek passing through his property came from a hot spring. He installed an electric pump and irrigated his vegetables from the warm creek. This prevented his produce from freezing and he received an excellent price for his late vegetables.

In egg storage, temperature is important. If temperatures are above 55 degrees or below 30, the whites of eggs become weak and watery and the yolks are visible in candling. With electric coolers controlled by thermostats, an ideal temperature of 50 degrees can be maintained.

Underground 'Phone Cable

Elimination Of Wires Foreseen By Research Experts

The birds that roap on telephone wires will have to find somewhere else to sit in the near future. Science, according to Dr. Oliver E. Buckley of New York, director of research for the Bell Telephone laboratories, is about to eliminate the wires.

In that place, he told Telephone company employees in Denver, Colo., recently, will be underground pipes, each capable of transmitting hundreds of messages simultaneously.

The newest development in telephone research is called the coaxial cable, Dr. Buckley said.

"I wonder what causes the flight of time?" "It is probably urged on by the spur of the moment."

A Swiss expert announces that there are more than 35 kinds of poisonous gases ready for use in the new war.

Coleman Hot Plate Cooks with Air!

Hot air is used for cooking. No gas, no electricity. Just Coleman's Hot Plate. Makes its own heat from the air. Burns 90% air—45% fuel. Makes its own heat from the air. Burns 90% air—45% fuel. Makes its own heat from the air. Burns 90% air—45% fuel.

PRICES AS LOW AS \$2.00. The Coleman Hot Plate. Burns 90% air—45% fuel. Makes its own heat from the air. Burns 90% air—45% fuel.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER III

The treasures of by-gone days were no mystery to Starr Ellison. She had been raised on them. In the days when fortune had smiled on the Ellison family, her father had been a collector of notes. In many ways their home, now in the hands of strangers, had been like a miniature museum. Egypt, though—Starr shuddered when she thought of it—and all things Egyptian, had been his hobby. A love which had eventually led to his death; had led his only daughter to her imminent death and a distressing poverty to precede it.

Ever since she could remember, Starr had been familiar with Egyptian kings and queens and princesses. As a child they had fascinated her, and she had made up her own stories about the lovely almond-eyed beings of a by-gone day who filled her father's cherished books and smiled at her with their long eyes from his paintings, his vases and bas-reliefs. When she was a little girl, her limbs were sinuous and whose eyes held mystery, so she had been told. Often she had wondered if the proximity to those pictured and sculptured women of another day could have had anything to do with her own eyes. With all she now had learned—in bitterness she prayed and hoped not.

She had no objective in her stroll through the Museum, realizing that she could not remain long, that it soon would be closed to her. It did not matter. She would merely wander around, look at a few sculptures, perhaps distract her mind from her woes.

She could not have told how it was, certainly by no intention of her own, but before she realized it, she was in the very center of the Egyptian room, the one place in all that vast storehouse of art and exhibition of all-age culture which she wished to avoid. And yet she had been drawn here, almost, it seemed, as if by some invisible magnet.

Her first horrified recognition of familiar figures on walls and in cases made her want to run. Oddly her feet were rooted to the floor. Her teeth clenched as a rush of emotion all but overcame her, and then her will power came to the fore.

"I won't run away!" she said between set teeth. "I won't! That's what I've been doing too long. What good has it done? No! They've already done all they can to me. . . I'll stay! Right here! I'll sit down and stare them all out of countenance, every Egyptian princess! I'll show them that at least I'm not afraid!"

To Starr, as she sat down on a stone bench, grimly setting her teeth, the bas-relief figures and the paintings of the Egyptian women with the long eyes and their queer head-dresses did not bring to her sensations. They seemed real. In particular . . . She clenched her hands, wet inside her gloves, as she stared. That priestess on the tall centre vase—She was like—like—

Suddenly the room in which she sat, the paintings and vases and bas-

reliefs and murals all faded and she was back, back with the living horror which even now tortured her, turned her dreams into nightmares. That smell—that odor of a centuries-sealed tomb, a desecrated tomb—was in her nostrils again. Like nothing she had ever known before or since. The awful, dank, musty, smothering smell of a tomb which had been sealed for nearly three thousand years. A veritable palace of the dead! In a great, deep silence that could almost be heard!

That trip to Egypt was to have made her father famous. Through all the expeditions that had occupied the man who was becoming known as an archeologist none had held for him any of the importance of this particular journey which had been planned for years. He and John Leasing, both intense students of Egyptian history and Egyptology in all its aspects, had planned with deep intensity for this one special trip. With one great objective in mind.

It was inevitable that Starr went along. She always had. She was of great help to her father who, like so many students, was inclined to be absent-minded, or single-purposed, and though he would work painstakingly at his books, he too often forgot neglect taking his meals at the spot, trusting to a memory not infallible. Star kept his notes, tabulated all his findings.

Their objective was the secret tomb of Tut-Amen-Ra, whose forbidden love for Ama-Sun, beautiful temple virgin, had incurred the wrath of the high priests. Contrary to the opinion of most historians, Professor Ellison believed that the ancient lovers were buried together. To prove that he was right was the one ambition of his life.

Naturally the trip was a long period of hard work, as there always is for such expeditions, and it was during those times, as well as from her earlier observations that Starr had some of the most marvelous experiences of her life. She had been so sure that she, too, had come to Egypt, all that was connected with it; realized her great zest for life, the eagerness to inhale the perfume of that strange land that Egypt and the desert can bring—that land where the days were a panorama of color and light, and the nights were a black-out on a movie screen, with always somewhere, though heard but dimly, the voice of a muezzin from the balcony of a minaret where he faced the east:

"La ilaha illa Allah!"

Every scene was painted indelibly on her memory. Cairo, with its street vendors and its colorful, dark men in turbans; women in their flowing dresses and spangled veils, hurrying along while their heavy silver ornaments jingled on their ankles and their mysterious eyes looked out above their veils—sombre and handsome with bright red nails which clutched their garments. Street sellers, some of them as incredibly old as the scarabs they sold, with wrinkled faces like warped leather. And the walks along the native streets in Cairo and in Luxor, and the walks through the smaller towns through which they passed—Walking past long rows of houses whose continuity was here and there broken by a mosque—houses and dimly lit cafes full of shrill life. Where veiled women hung over the balconies and the strangers who sought out the street of the sand diver.

And the journey through the desert! How well Starr could believe that oldest and sagest of all Arab sayings that "in the desert one forgets everything!" If she only could! Now she could only remember everything—everything!

Until she had seen the desert she had thought the great sweeps of mountains and prairie in her own land the most wonderful sight that God had prepared for man. But on her first sight of the desert even the most insignificant. It was an immense sea, of great distances where only oases showed like dark stains and added to the mystery. Mystery as far as the eye could see where the desert seemed to end, and the blue horizon, like some dreamed-of tropical sea, too far away to hear it murmur, but to imagine it.

Sometimes caravans passed their party, trains of camels with savage-looking riders, and then disappeared in the midst of the dunes touched crimson by the dying evening sun.

The desert bewildered her while it fascinated. The thousands upon thousands of sand dunes, crowned with its own dusty bush, rising to meet the eye, was like a wave, like some eternal procession of mute travelers. Near the ground dancing specks of light always quivered, like little dancing elves consigned to ceaseless movement in the eternal solitude.

Life in their desert camp, set al-

most at the edge of the Valley of the Queens where those aged-old beauties lay quietly sleeping, had never been lovely for Starr. It was a dream that blended in with her own dreams, making her forget that under the black velvet of the sky she was looking out over one vast cemetery. The night whispered to her, spoke of the loves of those by-gone people. One could think of love out here in these great, purple-pink spaces and better understand how one ancient love story had lured the gentle old man who was her father from across the sea, urging him to give his all to prove his theory that love had endured.

Day by day Starr watched the work, the laborious digging, the searching, the false moves. Only the more dramatic incidents now stood out in her mind and memory, but she would not forget that day when, the workmen having broken through to some opening and carted away enough debris so that her father could stumble through and flash his small pocket torch, how pale she trembled he had been when he had come back, panting as he gasped her arm.

"We've found it, Starr! Just a few more loads and we'll be through! A great granite sarcophagus is there, untouched!"

And to John Leasing:

"No doubt about it, John! I saw the inscription! It's there! It's there! Tomorrow we can get through!"

Their labors had been rewarded at last. Their digging uncovered a hidden stairway leading to that outer door of what was undoubtedly some Pharaoh's Tomb. Her father was scarcely able to speak, in his excitement. He could not sleep, and all the next day he never left the vicinity of the digging. Starr could not have told why it was, but from the moment of her father's discovery, instead of being elated, a terrible fear, a black cloud, had smothered down over her. No longer did the desert look beautiful, or benign. Her one thought was to get away from it. Impossible, of course, and she told herself she was only being silly.

But as the long day dragged through the feeling persisted. There was a strange sunset that night, and Starr could not have told why it was, but from the moment of her father's discovery, instead of being elated, a terrible fear, a black cloud, had smothered down over her. No longer did the desert look beautiful, or benign. Her one thought was to get away from it. Impossible, of course, and she told herself she was only being silly.

But as the long day dragged through the feeling persisted. There was a strange sunset that night, and Starr could not have told why it was, but from the moment of her father's discovery, instead of being elated, a terrible fear, a black cloud, had smothered down over her. No longer did the desert look beautiful, or benign. Her one thought was to get away from it. Impossible, of course, and she told herself she was only being silly.

That protesting sunset was just casting its last rays across desert and valley, the desert wind was blowing Starr's hair into a soft ebony halo beneath her wide hat, when Professor Ellison and John Leasing stepped over the threshold and entered the tomb which their workmen had uncovered from where it had lain for centuries. Starr's heart was in her mouth as she followed them, for her father laughed away her protests and her fear, insisted that they were on the opportunity of a life-time. Could she ever forget how he had led the way into that tomb, smiling in gentle triumph? The last time she was ever to see him smile? (To Be Continued)

Refuse To Participate

Jewish Swimmers Refuse To Take Part In Olympic Games And Are Suspended

The Austrian sports authorities suspended for two years Ruth Langer, 15-year-old swimmer and a member of the Hakoah Jewish sports club, for refusing to join the Austrian Olympic team.

Miss Langer's refusal to compete was in accordance with the decision of the Maccabi union, parent Jewish sports organization, to boycott the Olympic games. Previously another Jewish swimmer, 17-year-old Judith Deutsch, had been suspended for two years for refusing to participate.

Has Never Changed Address

Mrs. T. Layton, who has just celebrated her 80th birthday at Grafton, Australia, has lived all her life at the same address. She was born on the day her parents arrived in Australia, in 1856, on a sailing ship. Her father, a carpenter, built their house. For many years it was the only one on the lonely brackish track which is now one of Grafton's principal streets.

WILSON'S FLY PADS REALLY KILL

One pad kills flies all day and every day for 25¢. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET
WHY PAY MORE?
THE WILSON FLY PAD CO., Hamilton, Ont.

World Fallacies

Nations Seeking To Make Themselves Self-Sustaining Economic Units

Nations are seeking to make themselves economic units, self-sufficient, which no nation can ever do in this world, the essentials of modern science and industry being scattered and procurable only from widely separated sources.

Not liking the state of the world, some nations look to nationalism to save them. They, each of them, will draw apart and have nothing to do with the world. They will, as country boys used to say, crawl into a hole and draw the hole in after them. It is an unpromising effort.

It should be much easier to make the world fit to live in than to rely on the use of gas-masks. Britain having ordered 20 million of these. What of the many millions not masked?

In nearly all countries the idea appears to be that, as regards trade and commerce, the foreigner is a foe and an import an evil. The trade and commerce of the world was not built up on these fallacies. The ships of England fared forth across the world, not only to sell the cargoes they carried, but to come back laden with the products of other lands and the abundance of the returning cargo measured the success of the enterprise.

Now the idea is that ships should go abroad loaded with exports and come back with nothing but a satchel containing listed promises to pay that can be deposited in a bank. Of course it does not work—Toronto Star.

Planned Bomb-Proof House

But English Man May Prevent Man From Building It

With all the war talk in Europe a bomb-proof house has been suggested as a far-sighted idea, but it may be too much so to suit Barnet Rural Council of England. Alan Daly, of Elstree, recently announced that he had been commissioned by a wealthy client to construct the house. He offered the council the plan, but they refused to let it be built. "I am certain our surveyor would not pass the plans; such a house would offend certain building ordinances." When told of this Daly remarked, "Perhaps we shall have to abandon the project, but I shall submit the plan to the Ministry of Health. The building would cost about \$150,000."

Present From West Indies

Turtles Sent To Vancouver Will Be Made Into Soup

Cheer Cornelius Muyenberg made a bold study of West Indian turtles as four of them, a present to Vancouver from the Cayman Islands, slipped about in tanks in the kitchen of a Vancouver hotel.

For it is Muyenberg's job to transform the 250-pound amphibians into soup for the lord mayor of London who will be banqueted by the city's golden jubilee committee. The only thing that makes the job difficult is that the committee wants the shells intact.

However, Muyenberg is going to boil down the turtle shell and all. Only a little of the meat is used for the soup and one turtle will make about enough for 500 people.

Just On Commission

The big business man, obliged to take a quicker lunch than usual, went into a near-by cafe and ordered the best that could be had. Sitting opposite him was a well-built, over-slim, young man attacking some bread and cheese, who cast envious looks at his neighbor's plate. The latter noting this, nodded sympathetically and queried: "Athlete on a diet, old chap?"

"No," came the reply: "One of your travellers on commission."

"Leave the breakfast grapefruit in the refrigerator overnight," says a household hint. Then you can start the day with an invigorating cold shower.

Treasures From China

Priceless Things Brought From Orient For Vancouver's Jubilee.

The artisans of ancient Cathay showed their priceless products to the western world on a savoury-cold lot in Vancouver's Chinatown.

It was the Oriental's tribute to Vancouver's 50th birthday, this display of priceless art treasures from the Land of the Dragon. Olive-cheeked Chinese girls left the market stands to don kimono and guide wide-eyed tourists through the fair.

The heavy aroma of joss sticks burning before giant paper-canopied gods that guard the exhibition temples, spread out through the dark, shop-lined streets of the Oriental colony, into Vancouver's decorated section.

There were touches of the western world within the bamboo arch that formed a gateway to the fair. Soft drink stands bordered the famous gate, transported piece-by-piece from China and erected by architects brought from that country. Uncounted hundreds of hand-carved Oriental faces peered at those who examined its brilliant facade. Occasional stood—many for close to an hour—scanning the minute decorations of paper and bamboo that formed the portal. As tall as a five-story building, no nails were used in its construction.

Old Bible Manuscript

Part Of Book Of Deuteronomy In English Library

Four fragments of papyrus roll on which the book of Deuteronomy is inscribed, and to ante-date by 300 years any other Bible manuscript, was found in John Ryland's library in Manchester, England, C.H. Roberts, fellow at St. John's College, Oxford University, announced in a new book entitled "Two Biblical Papyri."

The roll, part of the Greek version of the Old Testament, the Septuagint, was written in the second century B.C., Roberts said. (The original Septuagint, which is still used by the Greek church, was written in Alexandria in 72 days by 72 Jews at the command of the Egyptian ruler, Ptolemy Philadelphus, sometime between 280 and 130 B.C.)

Roberts said that Papyri, part of a cartonnage used to wrap mummies by the Greeks, was bought in 1917 in a large bundle of miscellaneous Papyri, bore no indications of its origin.

Making Traffic Safe

Elderly Montreal Woman Takes Credit For Traffic Light System

Montreal's oldest professional woman, retired from piano-teaching only because she is almost 100 years old, believes an accident to her a few years ago brought the traffic light system to Montreal.

Although her many friends are sure she is near the 100-year mark, Miss Fanny Flourens Drummond vigorously denies that she is that old but declares she forgot her age long ago.

Miss Drummond started a campaign for a safe traffic system a few years ago when she was knocked down by an automobile while crossing a street intersection. Shortly after the accident the city installed the light system and the aged piano-teacher believes it was all her work.

Miss Drummond still possesses the picturesque vocabulary of the last century. To her a druggist will always be an apothecary.

Rows Across Bay Of Fundy

U.S. Lawyer Made Trip In Specially Constructed Boat

Having proved the Bay of Fundy could be crossed in a rowboat, Harry F. Phillips started away the vessel, in which he made the trip to Yarmouth, Nova Scotia, from Jonesport, Maine, and left aboard ship for Boston.

The lawyer became the first man to row across the Bay of Fundy in half a century. His boat was specially constructed for rough seas resembling a "double-end" dory. It was 13 feet long and weighed 112 pounds.

Three years' planning preceded the trip, Phillips said.

Well Explained

"Popper, what is a platform?" "A platform is a declaration of unobtainable objectives, so expressed as to arouse the maximum confusion with the minimum sincerity. It is a statement made by politicians with loose memories for consumption by voters who seldom read more than a page of anything unless it has pictures."—Montreal Star.

Loons can swim faster beneath the surface of the water than on it.

These don't taste like YOUR Pickles, Mother!

Mother was disappointed! She thought she had taken such care to have her mustard pickles just right. It was the fault of that cheap mustard she had used, thinking to save a few cents.

It is the pure mustard that gives pickles their favour and zest. Next time, mother will use KEEN'S D.S.F. MUSTARD.

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Superior grinding ensures the full mustard flavour.

In original tins for as little as 10¢

KEEN'S Mustard

D.S.F.

Little Helps For This Week

And Enoch walked with God; and he was not; for God took him. Gen. 5:24.

Oh! for a closer walk with God, A calm and heavenly frame: A light to shine upon my path, That leads me to the Lamb.

Is it possible for any of us these modern days to so live that we may walk with God? Can we walk with God in the shop, in the office, in the household and on the street? When an angel visits us, and our best laid plans fall to pieces, then can we walk with God? There is some flaw in the religion that fails us in the every-day trials and experiences of life. It should be more than a plank to sustain us in the every-day trials and land us exhausted and dripping on the other side. It ought, if it comes from above, to be every day to our souls like the wings of a bird bearing us away from the impediments which seek to hold us down. If the Divine Love be a conscious presence, an indwelling force with us, it will do this.

Australian Bushmen

Famous Black Trackers Are Employed By Police

A new dignity is to be conferred upon Australian "black-trackers" those stone age men with the all-seeing eyes.

Always these most amazing of bushmen, who are reputed to be able to follow the trail of an ant across a sunbaked rock, have been employed by the "mounties" who police the vast and primitive stretches of the northern territory.

Now, however, the black-trackers are to be formed into a native constabulary to help keep order among their fellows.

While constables depend not only upon the uncanny capabilities of these human bloodhounds, but also upon their courage and endurance.

Not New In Russia

Jazz Music Is As Old As The Earliest Folk Tunes

Jazz music may be comparatively new in America, but in Russia it is as old as the earliest folk tunes, according to Akim Tanflov.

The former Moscow Art theatre member says American jazz is practically the same as the zurna music of the Caucasus, so-called after one of the principal instruments on which it is played. The zurna, he says, is like the saxophone.

Smallest Woman Dead

Declared to be the smallest woman in the world, "Princess Elizabeth" has died in Bad Fymont, south of Hannover, Germany. She was 24.5 inches tall and 22 years old. Although she weighed only 22 pounds, she was the daughter of normal parents and sister of two strapping brothers of normal height.

Record Heat In Alaska

An Arctic heat wave was recorded at Nome when a new record was chalked up with the official listing at 83.3 degrees. The previous record of 81.4 degrees was recorded previously and before that the record stood at 80, recorded in August of 1928.

Berthold Schwartz, a German monk, is credited with the invention of firearms. Schwartz worked on his crude weapons between 1350 and 1354.

HORSES WORK BETTER

When fed from Biddle Bile, Oats, Barley, Triumphant, Colla, etc. by Minard's Linniment. Keeping the horse in the house saves Vet's and Doctor's bills.

Local News

Coleman Cafe is adding improvements by the construction of new booths.

Mr. Arthur Reid and son Harold returned on Tuesday from Vancouver.

Earl Stafford of Vancouver Island is the guest of his aunt, Mrs. R. Dunlop.

Mrs. Houghton, sr., went to Calgary on Tuesday to visit her son Harold and family.

Mrs. J. Lonsbury and son, William, are visiting Mr. and Mrs. Al. Lonsbury at Trail.

Mrs. George Kellock and son Jim left on Friday for a few weeks holiday in Vancouver.

Mrs. Blain of Vancouver visited her son and daughter-in-law, Mr. and Mrs. Ken Blain, this week.

Mr. and Mrs. Archie Beveridge will leave on Saturday for two weeks holiday at Vancouver and Victoria.

Gordon and Katherine Graham of Lacombe are visiting their grandfather, Mr. Frank G. Graham, and Mr. and Mrs. George Graham.

Albert Knowles has brightened his buildings on Centre street near the station by painting the fronts and painting the names of the firms occupying same.

At the championship track events at Blairmore Harry Thomas won the pole vault, and Elio D'Appolonia was second in the Shot-put event and in the javelin throw.

On August 20 and 21 lectures and demonstrations will be given by an expert of the Dickson Riley Institute, Winnipeg, in the United church club room. Keep this in mind, and see announcement next week. It will interest every lady in Coleman.

The Journal acknowledges two copies of "The Times of India," from Mr. R. Darke, Bank of Commerce. They cover Indian, British and world news and it is of interest to note that the make-up closely resembles the English newspapers, with the front page filled entirely with advertisements, just the opposite to Canadian daily newspaper practice, which keeps all ads. off the front page.

Shower This Morning; Fires Still Burning

For three minutes at 8.15 this morning a smart shower of rain brought temporary relief, after about 40 days hot dry weather.

It extended as far as the fire area, but was not sufficient to materially affect it. 250 men are still employed in the Castle River and Carbondale areas and will remain under Ranger Boulton till all danger of further damage is past. Temperature at 2 p.m. was 84.

Coal Company Directors Here

Lorne A. Campbell of Trail and Roseland, president of McGillivray Coal & Coke Co. and a director of International Co., James J. Warren, of Montreal, president of Consolidated Mining and Smelting Co., and a director of International and McGillivray companies, and H. A. Howard, a director of International, are here to-day in conference with the vice-president and general manager, G. Kellock.

FOR RENT: Two or three rooms, West Coleman. Apply John Sherk.

IMPOUNDED on July 27, light bay mare, white face, two white hind stockings, Branded T.J. left shoulder; also one sorrel colt, 2 years, branded left hip. Will be sold if not claimed.
